

Packaging that protects patients *and* the world they live in.

At Oliver, we've been delivering high-quality medical packaging solutions for more than 50 years. But as we head into the next 50, we are committed to helping our customers and partners waste less and recycle more.

Transparent With Our Data

We try to reduce our environmental footprint at every turn, in every facility, with the hopes of making an impact for a cleaner, more sustainable world.

746.4 tons of waste sent for recycling*

*Based on 2023 data, including Oliver's manufacturing facilities and major offices

Creating a Ripple Effect

In our design and material choices, we seek to reduce waste before it's created, generating a sustainability ripple effect across the healthcare value chain.

A Look at Our Partnership With Medtronic

Design & Material Choices

45% smaller package design
33% material reduction

Impact to Medtronic & the Environment

27 fewer sterilization cycles
23 fewer truckloads
60% reduction in solid waste

Together, We Can Create a More Sustainable World
