

End-to-End Solutions to Protect Your Device

In addition to our medical device packaging products, Oliver designs and offers SBS shelf cartons and corrugated sterilization master cartons for a total end-to-end solution.

Shelf Cartons and Shippers

We offer a wide variety of carton sizes, and specialize in the “hard to find” cartons ranging in size from 4” up to 80” in length for longer devices.

All cartons are precisely designed for your device, therefore, reducing valuable shelf space, packaging material and cost, all while offering optimal protection for your device.

All cartons and shippers can be pre-folded at score lines to allow for ease of manufacturing and reduction in scrap rates.

Both cartons and shippers can be ordered plain or with custom printed graphics and logos to maximize your product branding.

Oliver offers quick turnaround times and free high-quality prototypes for your evaluation.
