Oliver Healthcare Packaging Introduces LumaPeel: Their New Peelable Sealant Technology

- *Oliver-developed peelable sealant manufactured at Oliver's Wigginsbach, Germany facility*
- *Designed to provide a clean, consistent peel, LumaPeel is ideal for pouching applications for medical devices*

Trevose, Pennsylvania, USA – September 30, 2025 – Oliver Healthcare Packaging launches a peelable sealant film designed to maintain sterility and provide safe aseptic transfer. This peelable sealant marks an expansion of Oliver's portfolio beyond adhesive coatings and reinforces its commitment to delivering comprehensive solutions for sterile barrier systems.

LumaPeel is an Oliver-developed peelable sealant film technology, which is engineered directly into the film structure. Manufactured at Oliver's Wigginsbach, Germany facility, LumaPeel offers a wide sealing window that delivers reliable machine performance and strong, uniform seals. Specially formulated to provide a cohesive peel, this new peelable sealant is ideal for medical applications in need of a pouch.

"Peelable sealants have been part of Oliver's offering for many years now, but we are excited to be able to offer our customers and industry an Oliver-developed option. LumaPeel expands our product portfolio beyond coatings, giving customers more options for their packaging. It also builds on Oliver's coating expertise to meet a wider range of product and performance needs." said Michael Benevento, President and Chief Executive Officer, Oliver.
